

Task 22 - Doc - Learning Summary Report

Upload your learning summary report for feedback

[Personal Spikes - Suggestions]

Spike ??: <Title of the gap that you closed!>

Context: You've decided that you want to extend some of your work. Why?

Knowledge/Skill Gap: There should be a knowledge or skill gap that you're closing! What is it?

Goals/Deliverables:

[SPIKE REPORT] + [CODE] + [SHORT REPORT] // Deliver whichever is necessary

Think about what the ultimate goal is here. You'll need to create and execute a plan for closing the gap; what key points can you extract from that?

Make sure that you get your deliverables sorted properly:

1. Include all spike reports and short reports in one big document
 - a. That's right, you could include multiple extension spikes in this submission on Doubtfire!
2. Don't forget to put your code in your repository
 - a. Link to the repo (or specific branch) in your spike reports
 - b. This is a good opportunity to ~~double~~ triple check that the GP account has read access
3. If you have the opportunity, show off your code to the tutors
 - a. If it's really really **really** cool, you could show it off in your Distinction interview (if you booked on)!
 - b. Alternatively if you used this spike to help build your Distinction project, just mention that in your interview

Recommendations:

- Have a think over what you've done this semester - did you exceed expectations anywhere?
- Tutors may have mentioned specifically that you've gone well beyond the Pass requirement for a spike! Hopefully you made a note of that
- It doesn't have to be a huge spike, just an extension of learning
- Some suggestions:
 - True Type Fonts in your chosen Framework
 - More unit tests
 - maybe look at different frameworks
 - What about a pure TDD implementation
 - Advanced configuration - load **everything** from file!
 - Check out the ballistics spec!
